

Established in 1986, TeKONTROL, Inc. (TKi) provides security assistance, training, logistics support, equipment acquisition, sustainment and modernization, engineering support, IT support and program management to its global customers. TKi has established an outstanding reputation with both domestic and international customers as a reliable business partner that provides quick response, best value solutions to diverse business challenges.

TeKONTROL provides services as both a prime and subcontractor to its customers, who are primarily federal government departments and agencies. The Company proudly points to a remarkable track record of successful completion of a wide variety of projects in the FMS and CONUS arenas. TKi's primary contracts are with the U.S. Naval Education and Training Security Assistance Field Activity (NETSAFA) and its U.S. Army equivalent, the Security Assistance Training Management Organization (SATMO). TeKONTROL is also a small business prime contractor in the Navy's SeaPort Enhanced (SeaPort-e) [Multiple Award Contract \(MAC\)](#) program.

The Company has demonstrated that it is adept at performing in the military environment found at U.S. Government and foreign bases. Utilizing a seasoned, qualified and professional staff,

TKi has successfully completed, or is currently performing, projects in over forty (40) countries. TeKONTROL has delivered services on all contracts on time and within budget with a 99.9 percent performance rating. Our experience and personnel allow us to continuously offer our customers minimum risk business solutions.

The fundamental principles that drive the Company's goal to satisfy its customers and meet their needs are:

- A Thorough Understanding of Requirements
 - Prior Planning and Timely Adjustments
 - Clear Communications
 - With the Customer
 - With Regulatory Agencies
 - Within the TKi Team
-
- Meet Contract Requirements On Time and Within Budget
